Important Speech of Gen. Riley, of Missouri. We call immediate attention to the following speech. We commend the eloquent remarks to the studious perusal of all the patriots of the land : Speech of Gen. Riley, in the House of Represenntatives.

of Missouri, February 8, 1861. After a long and heated discussion on the reference of a bill amending the charter of the city of Carondelet to a standing committee of the House,

Mr. Riley obtained the floor and addressed the House: Mr. SPEAKER: Everybody is pitching into this matter like toad frogs into a willow swamp, on a lovely evening in the balmy month of June, when the mellow light of the full moon fills with a delicious flood the thin, etherial atmospheric air. [Applause.] Sir, I want to put in a word, or perhaps a word and a half. There seems to be a disposition to fight. I say, if there is any fighting to be done, come on with your corn-cobs and lightning-bugs! [Applause.] In the language of the ancient Roman, 'Come one, come all, this rock shall fly

From its firm base, in a pig's eye."

Now, there has been a great deal of bombast here today. I call it bombast from " Alpha " to " Omega."-I don't understand the meaning of the words though.) Sir, the question to refer is a great and magnificent question. It is the all-absorbing question-like a sponge, sir-a large unmeasurable sponge, of globe shape, in a small tumbler of water—it sucks up everything. Sir, I stand here with the weapons I have designated, to defend the righ's of St. Louis county, the rights of any other county—even the county of Cedar itself. [Laughter and applause.] Sir, the debate has assumed a latitudinosity. We have had a little black jack buncombe, a little two-bit buncombe, bombast buncombe, bung-hole buncombe, and the devil and his grandmother knows what other kind of buncombe .-

[Laughter.] Why, sir, just give some of 'em a little Southern soap and a little Northern water, and quicker than a hound pup can lick a skillet they will make enough buncombelather to wash the golden flock that roams abroad the szure meads of heaven. [Cheers and laughter.] I

allude to the starry firmanent. The Speaker. The gentleman is out of order. He

must confine himself to the question. Mr. Riley. Just retain your linen if you please. I'll stick to the text as close as a pitch plaster to a pine plank, or a lean pig to a hot jam rock. [Cries of "go on," "you'll do."

I want to say to these carboneriferous gentlemen, these igneous individuls, these detonating demonstrators, these pereginous volcanoes, come on with your combustibles! It I don't---well I'll suck the gulf of Mexico through a goose quill. [Laughter and applause.] Perhaps you think I am diminutive tubers and sparse in the mundane elevation. I tell you, the thing won't pay. The time will come when the nasal promontories of these disinterested grinders will be put to the stone, instead of their hardware. [Applause.] I am mighty afraid the machine is going to stop. The grease is giving out thundering fast. It is beginning to creak on its axis. Gendemen, it is my private opinion, confidentially expressed that all the "grit is pretty near worn off. [Applause.] Mr. Speaker, you must excuse me for my latitudinos ity and circumlocutoriness. My old blunderbuss scatters amazingly, but if anybody gets peppered, it ain' my fault if they are in the way.

Sir, these dandadical, supersquirtical, mahogany-faced gentry-what do they know about the blessings of free dom? About as much, sir, as a toad-frog does of high glory. Do they think they can escape me? * I'll follow them through pandemoniun and high water! [Cheers and laughter.

FOR THE WEEK ENDING MARCH 6TH, 1861.

TURPENTINE .- During the week just ended there has been a fair enquiry for this article from both shippers and distillers, and the market has ruled steady. On Friday there was an advance of 5 cents on hard, but the price of soft remains unchanged, and the market closes firm at \$1 80 for yellow dip, \$1 44 for virgin, and 95 cents for hard, per 280 Nos., 4s to 12s, by the bale of 200 lbs., at 20 cents per lb., 3 Salica, Alumina, &c. bs. The arrivals for the week ended this morning have months time, at any of our Railroad Depots in Eastern N been only moderate, and the sales foot up 3,695 bbis., as

SPIRITS TURPENTINE.—Since our review of Wednesday last there has been more firmness in this article, and the

market has had an advancing tendency, closing on yesterday with sales at 34 cents for straight-which is an advance of 2 cents for the week. The transactions have been limited in consequence of the material difference in the views of buyers and seilers, 331 cents having been quite freely offered 10779, 11026, 11307, 12269, 12726, 15388, 15598, 15620, 15723. on Saturday and Monday, and higher figures asked. Sales 18346, 19479, 21174, 21356, 21884, 21720, 21952, 23475, 23518, of only 718 bbls., as follov 4: Wednesday,. 50 bbis. at 33 cents per gallon for straight. Thursday, ... 31 " " 33

Saturday 37 " " 334 " " Tuesday 600 " " 34 Eo in .- In the market for this article we have no new feature to report during the week just closed. The receipts for some weeks past have been unusually light, and in consequence the stock of all kinds has become materially reduced, and is at present quite small; there is, however, no demand for the finer grades, and it is difficult to sell even at low figures. For the Common article the market is rather bester, the price having gone up 5 cents on Saturday, and sales were made of 5,000 bbls. at 80 cents for tale bbl. and 824 a 85 cents per bbl. of 310 lbs. CORN MEAL-The market is only moderately supplied, and we notice a fair demand for retailing purposes. None received from the country that we are aware of, and the sales have been confined to parcels from the granaries at 85 cents per bushel, in lots as wanted. Corron.—In the early part of the week under review there was more activity in the market for this article, and the riner grades were readily taken at an advance of ¿ cent on

Thursday, the sales on that day ranging from 11; 11; to 11; cents for middling-the lower grades going at first named figure, and the finer at our highest price. On Friday and Saturday, however, there was less animation in the market, and the sales made were at a basis of 114 cents for middling. Since the close of Saturday's transactions the market has Clothir ruled inactive, and no sales have been reported. WM. SMITH REESE, Chemist,

No. 27 South-street, New York. 13th July, 1858 .- Where the Sombrero Guano was applied was as good straw as the Peruvian, and I think was as full or more plump grain. 29th July, 1858 .- The wheat where Sombrero Guano was used weighed 62 lbs. to the bushel. The Peruvian weighed the same; No difference either in straw or grain. ROBERT J. HUGHEY.

Philip A. Ball, Esq., Baltimore, Md., Sept. 13, 1858, says, The corn where Sombrero was used is vigorous, green and strong, and the balance of the field, all good soil, looks sun-burnt and drooping. I wish you to send me ten tons." FACTS WORTH KNOWING.

Guanos are of two kinds -those in which Ammonia predominates, as in Peruvia, and those in which the Phosphates of Lime, &c., predominate, as in Sombrero, and others -Both experience and theory establish the fact, that Ammonia and Phosphate of Lime are essential ingredients for a general fertilizer, and consequently, for general purposes, proper mixture of the two is recommended. Whitst the Peruvian and other ammobiated Guan is are mere s'imulants or quicken rs of the soil, the Sombrero Guano is a permanent fertilizer, but of slower action and less percept ble effect the first year, unless aided by some stimulant. Hence BALDWIN is selecting a large stock of Silk and Gingham the great importance of combining the two in proper proportions, which, if done, makes the best, most concentent BALDWIN is selecting and having made to erder, Ladies' and economical fertilizer known. Assuming the cust of and Gents' Traveling Trunks, Bags, &c., from the great Peruvian Guano at \$60, and Sombrero at \$10 per ton, and with one-quarter of the former and three-quarters of the latter, (which proportions are recommended by experienced farmers.) it gives, at a cost of \$37,50 per ton, a fertilizer far more valuable and permanent than the Peruvian alone. Swords, Belts, Epsulets, &c., &c., at N. York cost for cash. The agriculturist need only be reminded of the nature of the two predominating ingredients in these different species of Guano to enable him to understand the the proper mide of BALDWIN will open a large and varied stock of fashion- its application. Whilst Ammonia (in the Peruvian) is hable to evaporate or rise, Phosphate of Lime (in the Sombrero) is heavy, and liable to sink below the reach of the roots of plants; therefore it should be either deposited in the hill or drill, with the crop, or used as a top dressing, in the proportion of 300 or 400 lbs. to the acre, according to the wants of the soil. If the two Guanos are combined and used as a top dressing, the spring is the best time, when the crop is assuming its sustenance and vigor, as at that ime the benfit of the Ammonia is less likely to be lost than if used in the fall or early winter. Also Manipulated Guano. For sale, in lots to suit, by
